

WEB DEVELOPER

We are looking to add to our team a tenacious, articulate and driven person to play a vital role in our multidisciplinary Product Team to deliver real solutions for real problems and be actively engaged in designing new features.

Responsibilities

Your primary purpose within the Product Team is to discover, experiment, prototype, code, deliver and maintain great data-driven, business oriented clean and elegant solutions. You will be supported by the entire team to ensure you have all the help you need in order to succeed.

- Brainstorm with the team to find new ideas to reach business objectives.
- Measure the impact of your own work.
- Design and implement logical and technical solutions.
- Write efficient, clean and elegant code.

Qualifications

- Relevant work experience in object-oriented programming.
- A strong Problem-Solving mindset.
- Familiarity with server-side MVC web frameworks (Laravel, Rails, Struts, Spring etc.).
- Familiarity with RDBMS or NoSQL databases.
- Experience with front-end frameworks (Vue.js / React.js, Nuxt.js/Next.js, etc.).
- Strong communication skills.
- Startupper and entrepreneurial approach.
- The ability to bring innovation solutions to problems.
- Collaborative approach to working with colleagues.
- Resilience when faced with obstacles and challenges.
- Open mind, proactivity and flexibility.

Nice to have

- HTML5 / CSS3 experience (including CSS preprocessor and cross-browser compatibility).
- Experience with TypeScript.
- Javascript / jQuery experience (or other preprocessors and libraries).
- Previous experience with Agile methodologies.
- Code version control – git.
- Experience with AWS.
- Experience with CI/CD.
- English level B1 or higher.
